Data Services

Design-centric and data-centric application developers need different things from their tools

Designer/Developer

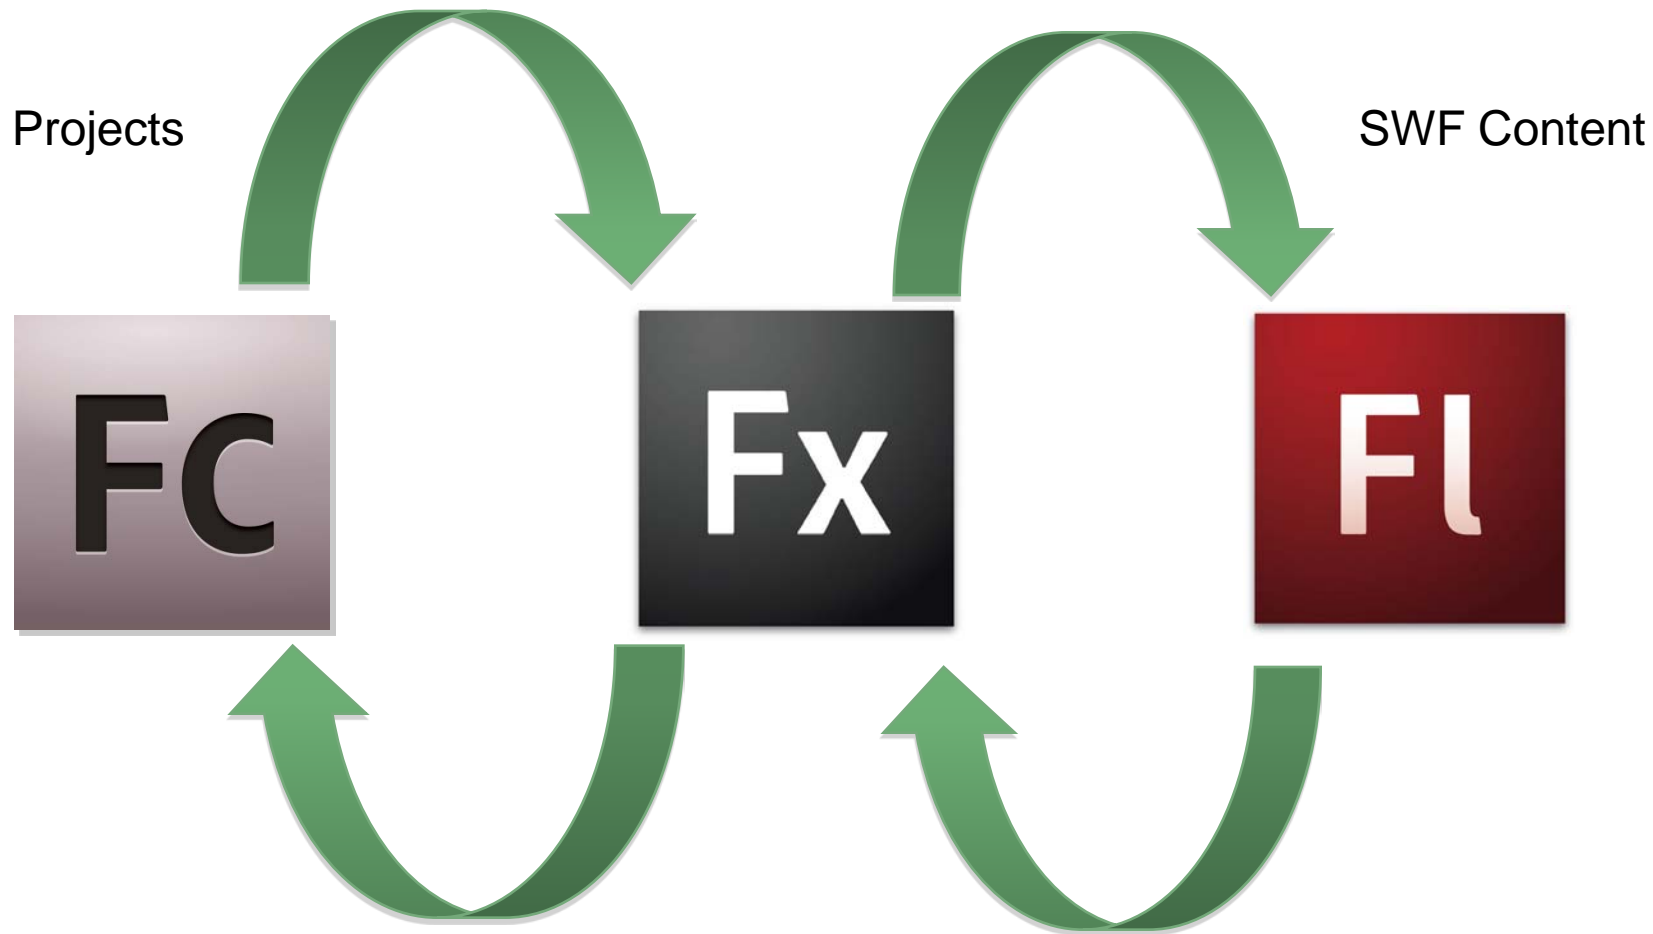

- Flash workflow
- Thermo workflow

IDE Productivity

- Coding improvements
- Group development
- Testing & debugging

Data-Centric RAD

- Connecting to data
- Data driven UI authoring

- Next Generation Debugging, Profiler, Refactoring
- Package Explorer
- Coding productivity
 - Templates
 - Event handler generation
 - ASDoc integrations
 - Getter/setter generation
- Unit testing
- Network Monitor

- Create data services for nearly any back-end
- Generate data model based on service introspection
- Generate data-aware rich UI from model
 - Grids
 - Forms
 - Lists
 - Etc.
